Securely recycling your electronics is a smart move.

The proper recycling of consumer electronics, or e-scrap, is **profitable** for you. And, don't worry about what's stored in your electronics. Our **data destruction confirmation** service ensures your vital information will never be seen and keeps you safe.

The Tri-County Recycling Facility

Expansions to Recycling Program

Recyclables in Brown, Outagamie and Winnebago counties are collected curbside and from drop off centers, and are then brought to the publically-owned and operated Tri-County Recycling Facility located in Appleton, WI.

The Tri-County Recycling Facility is where the recyclables are:

- Separated from one another by hand and by high tech sorting equipment
- Compressed into storage bales for easy shipping
- Marketed and sold to companies to be re-manufactured into a wide array of new products

The facility has grown to accept material from most northeast Wisconsin and Upper Michigan communities. Nearly 100,000 tons of recyclables are processed each year utilizing staff from a two-shift operation.

After careful consideration of the reliable and grow-

ing markets for cartons and other plastic types, the Tri-County Facility invested in an expansion to allow for the recovery of other materials. In December 2014, the recycling program announced its "newly" accepted items:

- Cartons (milk, juice, soup, wine, etc.)
- Dairy containers & Lids (yogurt, sour cream, margarine, cottage cheese, etc.)
- Produce, bakery and deli containers (berry, donut, potato salad, etc.)

The Tri-County Recycling Facility continues to be a centerpiece of Wisconsin's recycling industry, creating jobs, protecting the environment, conserving resources and encouraging all to **Recycle More...Landfill Less.**

2014 Recycling Success!!!

Last year **97,998 tons** of material was diverted from the landfill and recycled. This is equal to 6,533 semi truck loads!

*Recycling More...
Landfilling Less*

Group tours are available by calling 920-968-5721.

Tours are offered M - F, 8:00 am to 3:00 pm. 2nd Shift tours are offered upon request.

recycle!

Newly Accepted Items:

Cartons:

Milk • Soy Milk
Juice • Cream
Egg Substitutes
Broth • Soup
Wine • Etc.

Produce, Bakery & Deli Containers:

Berry • Donut
Potato Salad
Dips • Etc.

Dairy Containers:

Yogurt • Margarine
Cottage Cheese
Sour Cream
Etc.

Recycling Questions

TOP 5

1

NEW!

What plastics can I recycle?

All Plastic Bottles & Containers:

- Soda, Water & Other Drink Bottles
- Food & Household Bottles, Jars and Jugs
- Dairy Containers & Lids
- Produce, Bakery & Deli Containers

Please remember to empty and rinse all bottles and containers and to remove and discard all screw caps.

2

Should I remove my bottle caps?

Removing your bottle caps is a good recycling habit. When caps are left on, the liquids stay in the bottle which makes it difficult for the specialized machinery to properly sort the plastic. The bottle could end up in the trash rather than being recycled.

3

What do I do with plastic bags?

Plastic bags are highly recyclable, but **NOT** through your curbside program. The Tri-County Recycling Facility is not designed to remove plastic bags, and the bags wrap around the equipment causing maintenance issues.

Please take your plastic bags, wraps and other film plastics to a local retail or grocery store to be recycled.

See page 7 for more details!

4

Can I recycle aluminum foil and pie pans?

The Tri-County Recycling Program does **NOT** accept aluminum foil and pans because they are made from lower grade aluminum than the aluminum used to make beverage cans.

You may recycle aluminum pans and foil through a local scrap metal dealer.

5

What should I do with shredded paper?

To recycle shredded paper we ask that you put it in a paper bag; staple it closed, label the bag and put it in your curbside container.

This method keeps the pieces of paper from blowing around the neighborhoods while sitting at the curb, during transportation and at the recycling facility.

DO NOT use PLASTIC bags!

Where do I recycle plastic bags and wraps? **Not curbside!**

Recycle **clean, dry** plastic bags and film packaging

Newspaper Bags

Case Wrap
(e.g. snacks, beverage cases)

Produce Bags

Retail Bags

Food Storage Bags

Air Pillows

how2recycle.info

- ☒ ONLY frozen food bags with the above how2recycle label
- ☐ NO prewashed salad mix bags
- ☐ NO degradable bags

Napkin, Paper Towel, Bathroom Tissue and Diaper Wrap (packaging)

Bread Bags

Dry Cleaning Bags

Recycled plastic bags and wraps can become new packaging or durable home building products.

Electronics Recycling

Computers, computer accessories, TVs, cell phones and other electronics contain harmful materials including lead, mercury, cadmium, chromium, other heavy metals and chemical flame retardants. When thrown in the landfill, incinerated or illegally dumped, these chemicals can leach into the environment, where they may affect human and environmental health.

It is also important to recycle electronics because of the valuable reusable materials they contain, including plastics, metals, circuit boards and others. Recycling or reusing these materials reduces environmental impacts and economic costs by reducing the need for virgin materials in producing new electronics.

According to the DNR, electronics are one of the fastest growing parts of the waste stream in the United States. Each year there are millions of pounds of electronic waste in Wisconsin alone.

Many electronic devices have been banned from landfill disposal in Wisconsin. Although collection fees may still be imposed by local collectors for the recycling of the electronic device, this law was designed to make recycling more convenient, especially in rural areas.

State Law requires the following items to be recycled:

- Televisions
- Computers (desktop, laptop, notebook and tablet computers)
- Printers/scanners/copiers
- Computer monitors
- Computer accessories (keyboards, mice, speakers, hard drives and flash drives)
- E-readers
- DVD, VCR and DVR players
- Fax machines
- Cell phones

Recycling DOs & DON'Ts

Plastic

ACCEPT:

All Plastic Bottles & Containers:

- Soda, Water & Other Drink Bottles
- Food & Household Bottles, Jars and Jugs
- Dairy Containers & Lids
- Produce, Bakery & Deli Containers

DO NOT ACCEPT:

- No Plastic Bags, Wrap or Film
- No Motor Oil Bottles
- No Styrofoam

GUIDELINES:

- *Remove all screw caps and discard*
- *Rinse bottles and jugs*

Aluminum & Steel

ACCEPT:

- Aluminum Cans and Bottles
- Steel, Tin and Bi-Metal Cans
- Empty Aerosol Cans

DO NOT ACCEPT:

- No Aluminum Pans or Foil
- No Empty Paint Cans

GUIDELINES:

- *Rinse cans and bottles*
- *No need to remove labels*

Paper

ACCEPT:

- Milk, Juice & Soup Cartons
- Cardboard & Paperboard (cereal box)
- Newspaper & Inserts
- Junk Mail & Office Paper
- Phone Books, Books, Magazines & Catalogs
- Shredded Paper (put in brown paper bag & staple shut)

DO NOT ACCEPT:

- No Tissue
- No Paper Contaminated by Food or Grease

GUIDELINES:

- *Flatten and cut cardboard to no larger than 2' X 2'*

Glass

ACCEPT:

- Food and Beverage Bottles and Jars

DO NOT ACCEPT:

- No Windows, Ceramics or China

GUIDELINES:

- *Rinse bottles and jars*
- *Metal caps and lids should be recycled, discard plastic caps and lids*

Composting

Composting is Mother Nature's recycling method. By composting our food wastes and yard materials we can reduce the amount of trash put into landfills. In return, we create an all natural soil amendment which eliminates the need to use harsh fertilizers on our lawns and gardens.

What You'll Need:

- ☐ **Compost bin**, either manufactured or homemade (you can also leave the compost in a "heap," but this may be unsightly in urban areas)
- ☐ **Lawn and garden clippings, dry leaves**
- ☐ **Food scraps**, such as fruit rinds, coffee grounds, vegetable scraps, egg shells, etc. (No meat or oily foods)
- ☐ **Water source**
- ☐ **Pitch fork for turning**

Getting Started

Compost "recipes" vary among gardeners, but a good rule of thumb is 50 percent "green" material like grass clippings and food scraps, to 50 percent "brown" material such as dry leaves, and wood shavings. The "green" is rich in nitrogen and will keep the pile hot. The "brown" material adds carbon to the mix and will keep the pile

cool. Both work in concert to create the right blend for maximum compost creation.

Place your compost near a water source for easy watering in case your pile needs moisture. Your compost pile should feel like a rung-out sponge and smell earthy. If odor issues exist, you should turn the pile with a pitchfork to add oxygen and consider adding some "brown" material as well.

Depending on how carefully you manage your pile, composting can take from 1 month to 2 years. Most piles that are turned weekly and kept at the right moisture level can produce completed compost in about 6 to 8 weeks. Once your pile is a rich, dark color and you can hardly identify the materials you've added, you will have a finished product.

Problem Solving for Odor or Pests:

- ☐ **Odors:** These are usually caused by too many "greens" or the "greens" were not adequately stirred into the mixture. Try mixing in more "browns."
- ☐ **Rodents or animals:** Rodents are usually attracted to fatty foods or meats, which should not be added to the compost.
- ☐ **Moisture:** Too much or too little can cause problems. Cover your compost during rainy weather to avoid over-wetting and rotting. Sprinkle a little water on the pile only in periods of drought. The moisture consistency should remain that of a wrung-out sponge.

Proper Sharps Disposal

For Local Drop-Off Locations

Brown County

Page 20

Outagamie County

Page 24

Winnebago County

Page 29

Over 8 million people in the US use sharps to treat all sorts of medical conditions in the home, and the number of conditions treated at home with injectable medicines continues to rise.

Wisconsin law prohibits all sharps including needles, syringes and lancets, from being disposed of in household trash or with curbside recyclables.

The Tri-County Recycling Facility is finding an increased number of used needles being improperly disposed of in the household recyclables. Improper sharps disposal is a serious public health risk due to the potential for accidental needle

sticks during the hand sorting of recyclables. Accidental needle sticks may cause severe infection and may also spread communicable diseases such as Hepatitis B or C and HIV/AIDS.

THE FOLLOWING GUIDELINES ARE HIGHLY RECOMMENDED FOR ALL SHARPS USERS:

- Place used or discarded sharps in an acceptable sharps container.
- Take used sharps to a designated collection facility for proper disposal.
- Do not place used sharps in laundry detergent bottles, coffee cans, plastic milk jugs, plastic bags, aluminum cans or soda bottles since these containers routinely end up in recycling collection trucks and burst open in the trucks.

Never put used sharps in the trash or in your recycling!

For a complete list of collection facilities visit the DNR website at: <http://dnr.wi.gov/topic/healthwaste/householdsharps.html> or call the Department of Natural Resources at 608-266-2111.

10 Steps to Recovering Recycling

1

Collection: Trucks usually collect curbside recycling every other week.

2

Tip Floor: The trucks empty recyclables onto the tipping floor.

3

Metering Bin: This machine evenly meters the amount of recycling entering the facility.

4

Pre-Sort Line: The sorters remove items that may harm or interfere with equipment such as plastic bags, large metal items and trash.

5

Glass Collection:

Since glass is highly abrasive on conveyor belts and equipment, it is removed first and stored outside until it is shipped.

6

Paper Separation:

Disc Screens separate the paper from the containers. Workers look for items that don't belong in the paper. The paper is stored in hoppers until it is ready to be baled.

7

Container Separation:

Metal cans are removed from the conveyor belt by a large magnet. Employees and high-tech machines are used to sort plastics and aluminum.

8

Baling:

The materials need to be compressed into bales for easy shipping to buyers.

9

Shipping: When enough bales are created, a semi truck is loaded to deliver to buyers who remanufacture the material into new products.

10

Sales of the Material:

Paper: sold to local paper mills in Green Bay and Menasha

Plastics and Metal: sold mainly in the Midwest

Aluminum: sold to Anheuser Busch

Glass: sold to a local glass recycler in East Troy, WI

Medication Disposal

is a Two-Fold Issue

It wasn't long ago when DDT and PCBs were thought of as beneficial materials. However, today they are considered extremely hazardous and cause significant damage to public health, wildlife and the environment.

The potential dangers of improperly disposing over-the-counter and prescription medications may be the next great threat, but fortunately, there are a number of local disposal programs available to properly collect and dispose of unused and unwanted medications.

Environment

The impact of pharmaceutical waste on our environment has yet to be fully realized. Studies conducted both nationally and statewide have identified numerous medications showing up in our drinking water. The negative effects of these substances on humans, animals and aquatic life are only recently being studied and understood.

Medications enter the water system by being expelled from the body or when people flush them down the toilet or drain. Bathroom waste then travels to a wastewater treatment facility to be processed before being discharged into our lakes and rivers. In addition, some people throw medications in the trash. As the medication breaks down in the landfill it becomes part of the waste liquid called leachate. Leachate is collected in the landfill and sent to wastewater treat-

ment facilities to be processed before discharging into lakes and rivers.

Since most wastewater treatment facilities do NOT have the ability to remove medications from wastewater, flushing medications down the drain and toilet, or throwing them in your trash are NOT responsible disposal methods.

Abuse/Misuse

Pharmaceutical drugs, when abused or taken incorrectly, create a substantial health risk, and storing unused or outdated medications opens up the opportunity for misuse. One in five teens has reported intentionally misusing someone else's prescription medications and nearly half of the teens said they got the medications from friends or relatives by raiding their medicine cabinets. Accidental poisonings can also occur with children or pets who unintentionally consume medications that are improperly disposed.

Local Drop Boxes

In order to lessen environmental and safety concerns of left-over and unwanted medications, it is important to responsibly dispose of them at a local drop box or collection event. Brown, Outagamie and Winnebago Counties offer a number of convenient collection sites that residents may utilize.

Guidelines:

- Accept over-the-counter and prescription pills, liquids, creams, powders, inhalers and pet medications at no cost to participants.
- **No sharps or biological material.**
- **For residents ONLY!** No clinic, hospital or business disposal.
- Keep medications in original containers; do not mix pills.
- Remove patient's name from bottle with a permanent marker, but leave medication name intact.

2015 Agricultural & Household Hazardous Waste Clean Sweep

ACCEPTABLE MATERIALS:

Pesticides
Herbicides
Poisons
Dioxins
Lead & Oil Based Paint
Spray Paint
Varnish/Stain
Solvents
Gasoline
Automotive Fluids
Toxic Cleaners
Degreasers
Waxes/Polishes
Mercury
Unknown Chemicals

HOUSEHOLD HAZARDOUS MATERIALS

are found in sheds, garages, basements, craft rooms, workshops or under kitchen sinks in many homes. Often these products are labeled with words such as: Caution, Warning, Danger, Poison, Flammable, Combustible or Corrosive.

AGRICULTURAL HAZARDOUS MATERIALS

such as pesticides, herbicides and chemicals are found on both active and abandoned farms. Banned substances such as DDT, Chlodane, and Silvex 2, 4-D will be accepted.

BUSINESS HAZARDOUS MATERIALS

will be accepted from businesses identified as Very Small Quantity Generators (VSQG) and located within the participating Counties. Businesses must pay for their disposal costs, but may avoid on-site pick-up fees. Eligible businesses may receive a 50 percent subsidy for disposal of pesticide wastes.

Why Participate in this Event?

When disposed of improperly, household and agricultural hazardous materials can threaten the quality of our drinking water, increase the threat of algae bloom and threaten the safety of sanitation workers.

In addition, hazardous materials left around the house and garage pose an accidental poison risk to children and pets.

Important Information for Clean Sweep Participants

- **DO NOT MIX** materials together.
- Tighten caps/lids and transport materials upright in a cardboard box. Your containers must be left at the collection site.
- **Appointments are required.**
- Household containers are typically 5 gallons or less in size. Household or agricultural **containers larger than 5 gallons** should be identified when scheduling your appointment.
- Please identify the material source (i.e. your home, an active or abandoned farm).
- This service is free of charge for household and agricultural material but **donations will be accepted** to help offset program costs.

The following materials **WILL NOT** be accepted at the Clean Sweep Events.

For proper disposal, please contact your county.

- **Latex paint**
- **CFL and fluorescent light bulbs**
- **Vehicle and household batteries**
- **Propane cylinders and gas tanks**
- **Explosives and ammunition**
- **Radioactive material** (smoke detectors)
- **Electronic devices**

2015 Clean Sweep Event Locations

April 24,
9:00-11:00 AM

Appointments are required. Call 920-849-1450 or visit www.WinnebagoCountySolidWaste.com to schedule an appointment.

Brown County

Household Hazardous Waste Facility

Household Hazardous Waste (HHW) Facility | 2561 South Broadway | Ashwaubenon

Questions: (920) 492-4950 or www.BrownCountyRecycling.org

Business and farm material by appointment **ONLY** (920) 492-4950

Residential Drop-Off Hours:

Thursdays - Noon to 6 p.m.

Saturdays - 8 a.m. to 2 p.m.

Product Exchange Room:

Thursdays - 1 p.m. to 6 p.m.

Saturdays - 8 a.m. to 2 p.m.

The Brown County Household Hazardous Waste facility accepts material from households and small businesses that pose a threat to human health and the environment. These are materials that are flammable, poisonous, corrosive or reactive. The facility is available to residents of Brown, Outagamie and Winnebago Counties. Businesses and residents of other counties will be charged a fee to drop off material at the facility.

Acceptable Materials

- Flammable - Paint, gasoline, paint thinners, solvents
- Corrosive - Acids, bases, cleaning products
- Reactive - Pool chemicals
- Poisonous/Toxic - Pesticides, cleaning products
- Others - Fluorescent lights, ballast, computers and electronics (for a charge), cooking oil, propane tanks, oil, antifreeze, batteries

Materials that **cannot** be brought to the Household Hazardous Waste Facility are tires, infectious and biological wastes, radioactive material, explosives and ammunition. Visit our website www.BrownCountyRecycling.org for more information in regards to the disposal of these materials.

Product Exchange Room

- Much of the material brought to the facility is in good shape and doesn't need to be disposed of. Each year, 1,000s of paints, stains, thinners, pesticides, automotive products, cleaning products, etc. are placed in our Product Exchange Room for the public to take for free. This is a great place to find free material for home repairs and fix ups!

Unacceptable Materials

- Explosives, ammunition, black powder
- Flares
- Sharps
- Biological Waste
- Infectious Waste
- Radioactive Material
- Pharmaceuticals

What Do We Do With It?

- Most materials, like paint and solvents, are bulked into 55-gallon drums. These drums are removed by a hazardous waste contractor who further bulks the material for transportation to a company that uses it as fuel.
- Some materials, like pesticides, are packed into drums called loose packs. Loose packs are drums filled with smaller containers. These drums are sent to a disposal company for additional sorting.
- Acids and bases are sent for disposal in lab packs.
- Latex paint is sent to a company to recycle into new paint.

Household Sharps Drop Off Sites

To reduce public health risks such as accidental needle sticks, Wisconsin law requires all citizens to manage sharps safely. It is illegal to put sharps in the trash or with recyclables.

Sharps users are highly encouraged to place their used or discarded sharps in an acceptable sharps container and take them to a designated sharps collection station for proper disposal.

Sharps are accepted at many pharmacies, hospitals and clinics throughout Brown County. For specific drop off locations and program guidelines go to **BrownCountyRecycling.org** and click on "Sharps" on the right side of the page or call the Brown County Health Department at (920) 448-6400.

Participating business who may offer sharps collection include:

- Aurora Baycare
- Aurora Pharmacies
- Bellin Health Clinics
- Bellin Memorial Hospital
- Brown County Health Dept
- CVS Pharmacies
- Dousman Clinic
- Krider's Pharmacy
- Prevea Health East De Pere
- Shopko Pharmacies
- Shopko Express
- St. Mary's Hospital
- St. Vincent Hospital
- Walgreens Pharmacies

Electronics Recycling

Residents have many opportunities to recycle electronics.

The following items are banned from landfill disposal: televisions, computers, DVD/VCR players, fax machines, keyboards, mice, speakers, flash drives, hard drives and cell phones.

Call ahead for information on pricing and guidelines.

Waste Oil Drop Off Sites

Did you know... if you recycle just two gallons of waste oil it can generate enough electricity to run the average household for almost 24 hours? Oil is a valuable, reusable material. It doesn't wear out – it just gets dirty. Used oil and filters brought to a collection site will be recycled and re-refined into clean motor oil or used as an alternative energy source.

Guidelines:

- Use a dirt-free container with a leak-proof lid.
- Do Not use containers that previously held household chemicals, such as cleaners, solvents, fuel (gasoline), paint or bleach.
- Do Not contaminate used oil with solvents or other material such as anti-freeze.

Call ahead for program information.

EXCEPTIONAL PERSONAL SERVICE & UNBEATABLE PRICES

Whatever you need, Van's Waste has containers, hauling and recycling services to meet those needs.

WE SPECIALIZE IN OFFERING SERVICES FOR:

Commercial & Industrial • Construction & Demolition (C&D)
Residential/Homeowner Projects • Recycling • Roofing

OUR PRODUCTS CONSIST OF:

Roll-Off Containers • Front Loader Containers • Clean-Up/Construction Containers
Demolition Containers • Roofing Containers • Recycling Containers and Service
Trash Compactor Sales and Service

Van's Waste locally owned & operated

Call us at (920) 687-2631 to order a waste container today or visit www.vanswasteinc.com for additional information.

Brown County Food Waste & Organics Drop Off Program

Looking for a way to reduce the amount of waste in our landfills? Well, there's good news for Brown County residents. The Brown County Food Waste & Organics Drop-off Program is a pilot program that began in late 2014, that allows residents to bring compostable organic waste like coffee grounds, fruit peels and pizza boxes to a drop-off site.

Why divert food waste from landfills?

Food waste makes up more than a quarter of the total waste stream. Reducing food waste has significant economic, social & environmental benefits including: reducing methane from landfills, reducing energy waste associated with food production, creating a valuable soil amendment, improving sanitation, reducing costs by purchasing only food that will be used, and feeding people and animals.

The US EPA has developed a Food Recovery Hierarchy to help prioritize ways organizations and people can prevent and divert wasted food.

- **Reduction/Prevention**

Preventing food waste before it is created

- **Feeding People**

Donating fresh, wholesome food to those in need

- **Feeding Animals**

Feeding safe, fresh food scraps to animals like pigs

- **Industrial Uses**

Rendering fats, oils, and grease and turning it into products or biofuel

- **Composting**

Turning food waste into a valuable soil amendment

- **Anaerobic Digestion**

Turning food waste into renewable energy and a valuable soil amendment

The Brown County Food Waste & Organics Drop-off Program offers anyone, including avid backyard composters, the opportunity to keep nontraditional back yard composting materials like paper towels, napkins, meat and bones, dairy products, greasy pizza boxes, and much more out of our landfill.

The organic material collected is taken to the University of Wisconsin-Oshkosh's bio-digester, where the materials are broken down during a digesting process. The digesting process generates methane gas used to create electricity and a high quality soil amendment that is sold. The pilot program will help us evaluate and identify composting and other food waste disposal options, contamination issues, energy creating potential of the material, and the feasibility of a county-owned and operated composting facility or bio-digestion system.

Sign Up NOW to bringing your food waste and other organic material to one of two locations, by registering at BrownCountyRecycling.org/organics or call (920) 492-4950.

DROP-OFF LOCATIONS:

- **Brown County Recycling Transfer Station**, 2561 S Broadway, Mon – Fri 7:30 am to 4:00 pm & Saturday 8:00 am to 2:00 pm
- **Brown County Solid Waste Transfer Station**, 3734 W Mason, Mon – Fri 7:30 am to 4:00 pm & Saturday 7:30 am to 2:00 pm

Household Hazardous Waste Guidelines

A SERVICE PROVIDED FOR NORTHEAST WISCONSIN RESIDENTS

Many products contain hazardous materials. Improper disposal of these products can cause harm to humans and the environment. This guide will help you identify hazardous products around your home. **Keep your home safe by properly disposing of hazardous products!**

- Smoke Alarms
- Medical Wastes
- Asbestos*
- Bulbs*
- Propane Tanks*

**These items may be disposed of for a fee.*

**No containers over 5 gallons
No trailer sized loads**

Latex Paint Disposal

Latex paint is made from water and is not hazardous. If the paint can says to "clean with soap and water" it is latex paint. Disposal Directions: For **SMALL** amounts: Remove the lid and let dry. Occasionally stir the paint. For **LARGE** amounts: Line a box with a plastic bag. Place an absorbent material (kitty litter, oil-dry) on the bottom, pour a layer of paint and repeat as necessary. Dispose of dried paint and dry, empty paint cans in the trash.

Household Sharps Drop Off Sites

To reduce public health risks such as accidental needle sticks, Wisconsin law requires all citizens to manage sharps safely. **It is illegal to put sharps in the trash or with recyclables.**

Sharps users are highly encouraged to place their used or discarded sharps in an acceptable sharps container and take them to a designated sharps collection station for proper disposal.

**NEVER PUT SHARPS IN RECYCLING OR TRASH.
Call ahead for program information.**

Battery Recycling Locations

Laptops, power tools, MP3 players and cell phones are just a few of the battery operated devices that have become part of our daily lives.

Various types of batteries such as rechargeable and vehicle batteries contain toxic heavy metals that may harm our environment if they are not properly disposed. Recycling opportunities exist for these battery types, lessening the environmental risks.

Typical alkaline batteries (button type, AAA, AA, C, D, 6V, 9V) are NOT considered hazardous and can go into your trash.

Fluorescent Bulb Recycling Locations

All fluorescent bulbs, including the compact fluorescents (CFLs), contain mercury. These bulbs often break when thrown into a dumpster, trash can or compactor, and end up in our landfills. By recycling CFLs and other type fluorescent bulbs we can minimize the amount of mercury being released into the environment. Recycling bulbs also allows for the reuse of glass, metals and other materials within the bulb. Virtually all components of a fluorescent bulb can be recycled.

TAKE A BOW

You Deserve It!

Foth would like to take this opportunity to congratulate **Brown, Outagamie, and Winnebago Counties (BOW)** on their recent success to add new plastic and carton recycling capabilities at the regional Recycling Facility. You and your communities should be proud that your efforts have increased recycling and have been recognized through the receipt of the **2015 Outstanding Achievement in Recycling Award** presented by the Associated Recyclers of Wisconsin. Foth is pleased to be assisting the regional recycling programs through our work with Outagamie County on recyclable market research, and the recyclable compactor installation projects at the Brown and Winnebago County transfer stations. These projects will further increase recycling system efficiencies and maximize value as part of BOW's goals for constant improvement.
